-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on October 01, 2003 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thorsnes in view of DeHaitre.

Thorsnes discloses, Fig. 1 and 2, an arrangement of a wood truss or beam effectively being formed by two beams each having a plurality of chords 6/6 with at least one of the chords from each beam extending parallel and adjacent one another and having a fastener in the form of screw 7 extending through a bore formed within the wood structural chord members.

DeHaitre discloses a screw and utilization thereof in which the screw possesses a head 14, pointed end portion 46 formed with a plurality of thread convolutions and recesses providing a cutting edge, a threaded shank portion 16/44 extending from the

pointed end portion 46, a knurled portion 18 extending from the threaded shank portion 16/44, and an unthreaded shank portion 10 extending from the knurled portion to the head end. The knurled portion serves to effectively bend buckle and crush the wood fibers of the member through which the DeHaitre fastener extends.

To have employed the fastener of DeHaitre within the assembly of Thorsnes as the screws 7, thus affording the advantages of the DeHaitre screw, (such as ease of application and secure engagement), would have constituted an obvious expedient to one having ordinary skill in the art as taught by DeHaitre. The resulting Thorsnes truss/beam can be utilized as a roof beam as well as a column beam but it would have constituted an obvious expedient to one having ordinary skill in the art to have utilized the resulting Thorsnes truss/beam within either of a roof or wall assembly.
